TOPIC

Saba Meeting

UI Refresh

SABA MEETING

→ Brand New UI for Saba Meeting

WHAT?	Enhanced the Saba Meeting UI. No more Black and Green
WHY?	To match it with the Saba Cloud Branding and keep the design consistent
WHERE?	<ul style="list-style-type: none">• App Client 8.5.6 and above – Windows and MAC
NOTEWORTHY	<ul style="list-style-type: none">✓ CLEANER. More universal design. Less verbose. More whitespace. Less visual noise. New font. Round images & Flat iconography✓ LEANER. Improved performance (flat icons + lack of gradients and button type images allow pages to load faster)✓ EASIER TO USE. Easier to understand; Easier to use (simpler, consistent, design) including larger field and font sizes. Fewer clicks. Less design variation (primary buttons to the right).

SABA MEETING

→ Brand New UI for Saba Meeting

NOTEWORTHY

- ✓ The new Roboto Font
- ✓ Primary buttons always to the right
- ✓ The flat icons
- ✓ The cute emoticons
- ✓ Fresh evaluation display

Did you know?

- Agenda Builder mode is now available in the App itself – if user has appropriate rights.
- As before, content can be organized and sequenced. Polls, evaluations, and activity placeholders can be added at appropriate point in agenda.
- Agenda can be used in same event or exported as a .SAZ file.
- Server-side document conversion of files (DCS) is available for hosted customers.

Tests and Surveys in Saba Meeting will follow styling of Saba Cloud Assessment "Impact" Theme

Did you know?

- Tests and Surveys can be created in Saba Cloud Assessment and imported into Saba Meeting.
- Tests and Surveys can also be created in App Agenda Builder Mode and in the legacy Agenda Builder tool.
- Regardless, scoring tests will report results back to Saba Cloud and Saba Enterprise. In Saba Cloud a summary test score can auto-complete the class.

Key Take-aways!

- Customers need to upgrade to the latest version i.e. 8.5.6 +
- Browser App Client UI is updated.
 - **Express Client** (WebRTC) already has a lighter look - future plans to enhance
 - **Mobile App** needs to be updated from black/green – future plans to enhance
 - **Legacy desktop** – no plans to update UI (deprecated the support)
- “Content” components are updated across clients (legacy version supported)
 - Welcome Page
 - Polls
 - Evaluations
 - Download File page

Above are not client dependent but served up by server, so neither the client nor the client version is relevant. That means that an older App version that does not have UI refresh will still see the “fresh look” for above content items

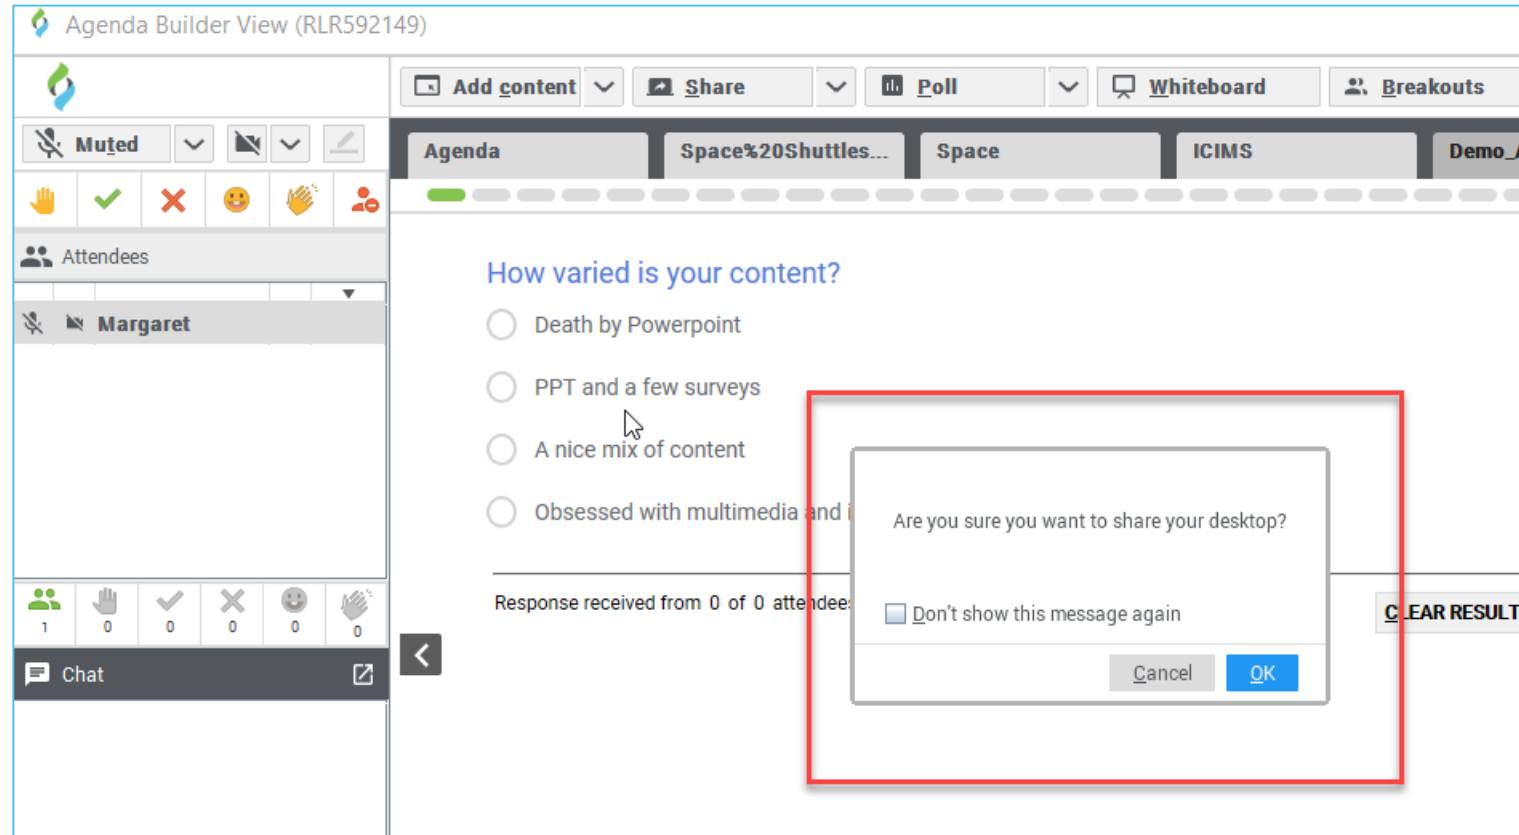

UX Enhancement

SABA MEETING

→ Appshare messaging

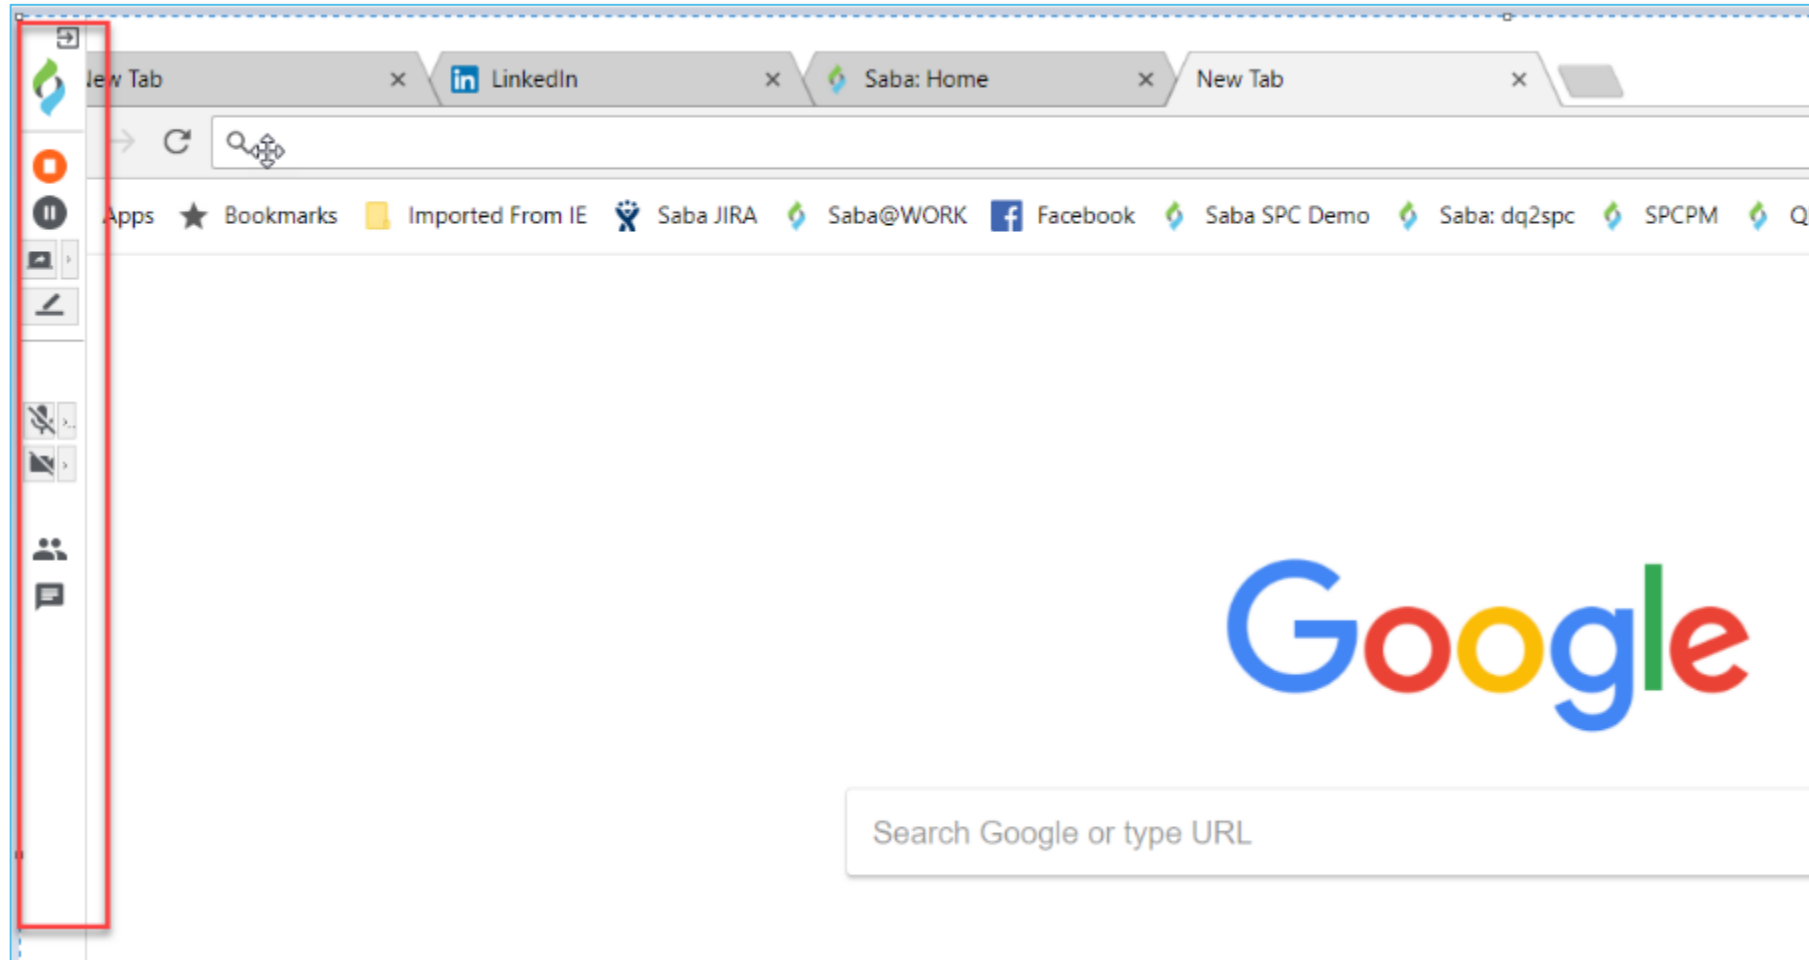

WHAT?	Appsharing – Hidden the “You are sharing your desktop” panel/message from participant view
WHY?	Participants were confused seeing the message whether its their screens which is being shared
WHERE?	<ul style="list-style-type: none">• App Client 8.5.6 and above – Windows and MAC• Leader – Share Desktop/Screen/Apps
NOTEWORTHY	<ul style="list-style-type: none">✓ Leader/Presenter has to confirm before sharing his/her screen. This confirmation can be unchecked for future✓ Participants can also see whose desktop is being shared.

Share Screen - Confirmation

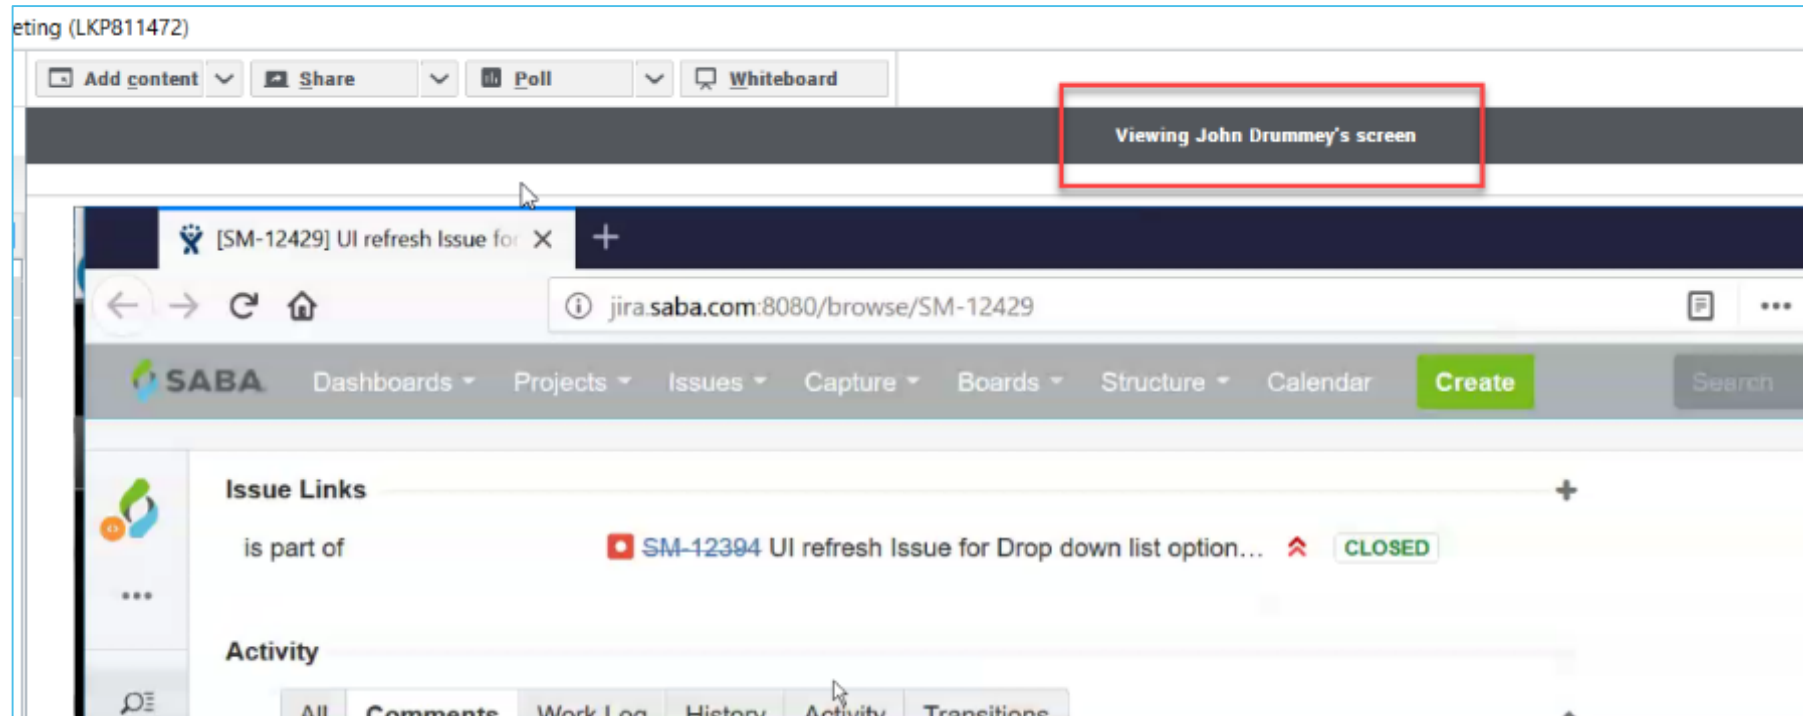

Can check the box to not have the message displayed again

Screen Shared

Desktop/Screen is now shared with the default expanded view and the desktop shared.

Participant – Can see whose screen is being shared.

EU - GDPR

SABA MEETING – EU GDPR Compliance

→ Purge User Details from the Saba Meeting Records

WHAT?	Ability to automatically delete users from Saba Meeting when the corresponding terminated users are purged in Saba Cloud
WHY?	To comply with the new EU GDPR law
WHERE?	<ul style="list-style-type: none">Admin >> System >> Manage Background Jobs >> Job Dashboard
NOTEWORTHY	<ul style="list-style-type: none">To trigger these SMF jobs, the Meeting service must be enabled when terminated users are purged in Saba Cloud.Even if a user is obfuscated and deleted from Saba Meeting, recordings of meetings the user has led or attended as a participant or presenter continue to be available and accessible in Saba Cloud.The "Meet Now" room name of the purged user is changed in Saba Cloud. However, any users who attended that meeting can playback any recordings by accessing the room URL.System does not obfuscate the names of the participants from the Saba Meeting recordingsSystem does not obfuscate the names of the participants from the chat logs

SMF Jobs

The screenshot displays the 'SYSTEM' tab in the Saba Software interface. The top navigation bar includes tabs for ADMIN HOME, PEOPLE, HR, SOCIAL, MEETINGS, COMPENSATION, INSTRUCTOR, LEARNING, ECOMMERCE, PERFORMANCE, PULSE 360, RECRUITING, MARKETPLACE, EXTENDED INTEGRATION, SYSTEM (selected), and ANALYTICS. The left sidebar lists various system management options, with 'Job Dashboard' highlighted. The main content area shows the 'Job Dashboard' with a 'Range*' dropdown set to 'Today' and a 'Start Date*' field. A dropdown menu for 'Event' is open, showing three options: 'Centra asynchronous process', 'Centra Asynchronous Process to Purge User' (highlighted), and 'Centra Asynchronous Process to Retry Purge User'. At the bottom right, a legend indicates 'Success' (green), 'Failed' (blue), and 'Duplicate' (red). A bar chart shows a total of 600 with 568 in the 'Success' category.

The SMF Jobs are scheduled to be run to delete the Saba Cloud purged users from the Saba Meeting database

Text Chat Enhancements

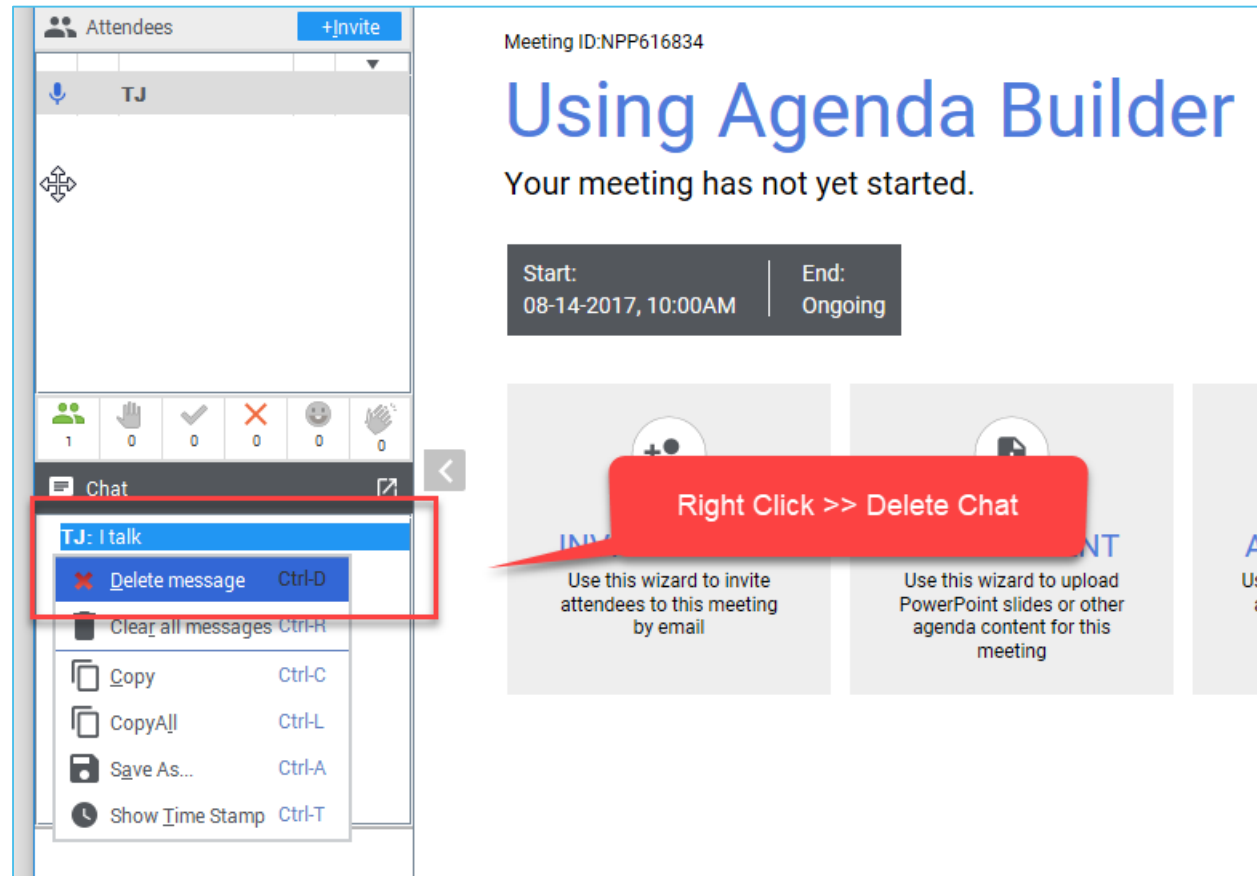

SABA MEETING

→ Participant - Delete Individual Chat

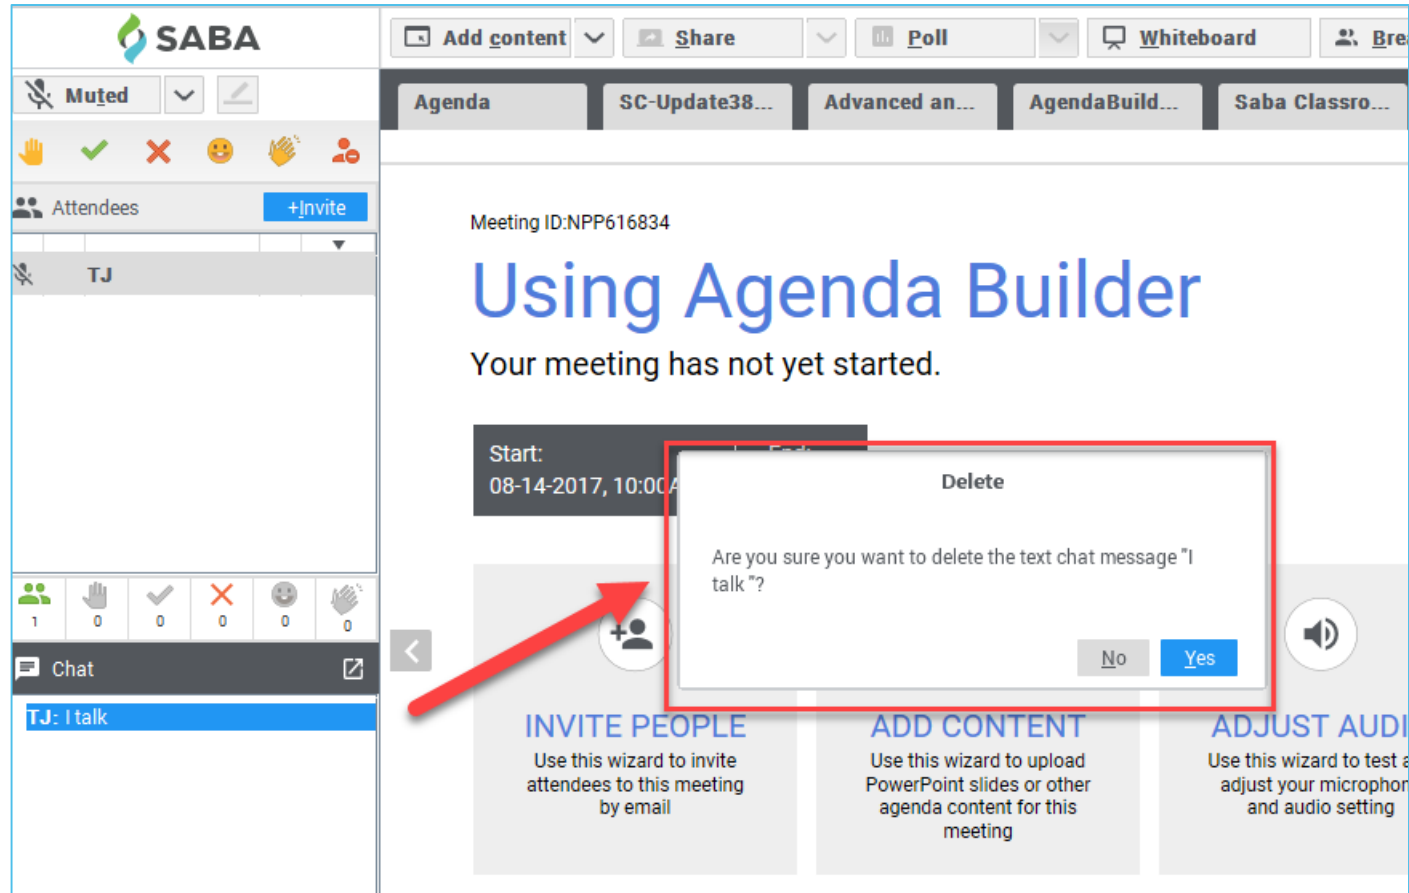

WHAT?	Ability for the participant to delete the chat which he/she sent
WHY?	To allow the participants to delete the text chats added accidentally or the chat which needs to be discarded
WHERE?	<ul style="list-style-type: none">• Saba Meeting App >> Chat Panel >> Right Click on your (participant) name >> Delete Chat
NOTEWORTHY	<ul style="list-style-type: none">• Once deleted, the chat is deleted for all participants.• The deleted chat gets discarded at run-time during the recordings (it means that the deleted chat will be visible during recording till the time it was deleted)

Delete Individual Chat

The Chats entered can be deleted by right-clicking on the chat

Delete Individual Chat

Confirmation Message is displayed before deleting the Chat

Saba Meeting

→ Leader - Clear All Chats or delete any specific Individual Chat

WHAT?	Ability for the leader to clear all the chats or delete any specific chat
WHY?	To have the chats added before the meeting started or before the recording begins cleared just to begin on a clean slate, or to just delete a individual chat added by the participants which is accidentally added or is controversial / not in the right spirit.
WHERE?	<ul style="list-style-type: none">• Saba Meeting App >> Chat Panel >> Right Click on participant name >> Clear all chat / Delete chat
NOTEWORTHY	<ul style="list-style-type: none">• Leader can delete any participants chat instance/entry• Once deleted, the chat is deleted for all participants.• The deleted chat gets discarded at run-time during the recordings (it means that the deleted chat will be visible during recording till the time it was deleted)

Leader - Clear all messages

The screenshot displays a meeting interface with a sidebar on the left and a main content area on the right. The sidebar includes an 'Attendees' list with a '+Invite' button, a list of participants (TJ, Vineet Kane), and a 'Chat' section. The chat section shows a message from 'TJ: I just want to delete my comments' and a context menu with options: 'Delete message Ctrl-D', 'Clear all messages Ctrl-R', 'Copy Ctrl-C', 'Copy All Ctrl-L', and 'Save As... Ctrl-A'. The main content area shows the meeting ID 'NPP616834', the title 'Using Agenda Builder', and the status 'Your meeting has not yet started.' Below this, there are three cards: 'INVITE', 'ADD CONTENT', and 'ADJUST AUDIO'. A red callout box with the text 'Clear all messages' points to the 'Clear all messages' option in the chat context menu.

All the chats entered can be cleared by right-clicking on the chat

As Leader - Delete Individual Chat

The screenshot displays the Saba meeting interface. On the left, the 'Attendees' panel shows two participants: 'TJ' and 'Vineet Kane'. Below this is a 'Chat' window with a message history. The message history shows 'TJ: I talk', 'TJ: I just want to delete my comments', and 'Vineet Kane: Whats happening here?'. A context menu is open over the last message, showing options: 'Delete message Ctrl-D', 'Clear all messages Ctrl-R', 'Copy Ctrl-C', and 'CopyAll Ctrl-L'. The main meeting area on the right displays the 'Meeting ID: NPP616834' and the title 'Using Agenda Builder'. Below the title, it says 'Your meeting has not yet started.' and shows the meeting status: 'Start: 08-14-2017, 10:00AM' and 'End: Ongoing'. At the bottom of the main area, there are three large buttons: 'INVITE PEOPLE' (with a plus and person icon), 'ADD CONTENT' (with a plus and document icon), and 'ADJUST AUDIO' (with a speaker icon). Each button has a description of its function.

Delete a participants chat entry

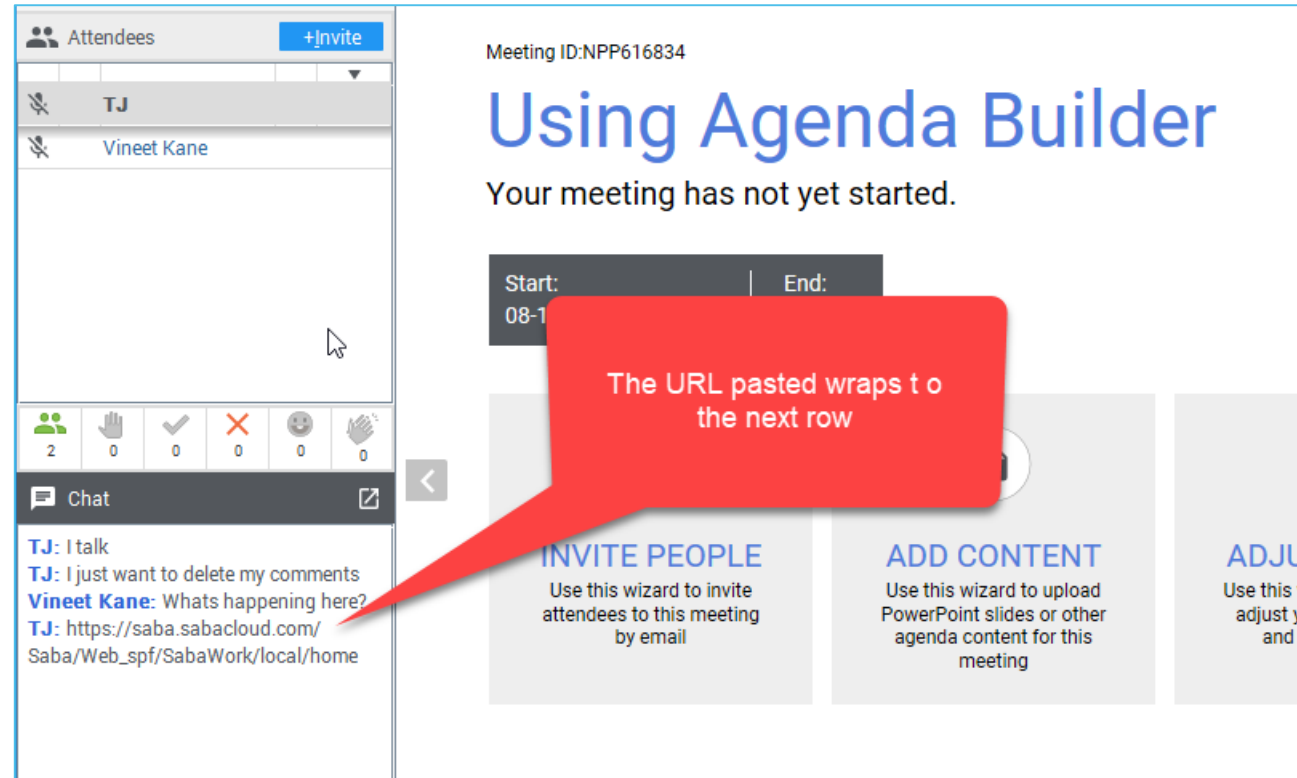

Saba Meeting

→ Wrap long text (URL) to the next line

WHAT?	URLs entered in the chat log are wrapped to the next line
WHY?	To prevent the horizontal scroll which appears when a URL is pasted in the chat by a participant thus affecting the user experience for all the participants
WHERE?	<ul style="list-style-type: none">• Saba Meeting App >> Chat Panel >> Paste URL
NOTEWORTHY	<ul style="list-style-type: none">• The entered URL needs to be right clicked and copied to paste it in a browser• The pasted URL cannot be clicked (future story) to open the URL in a new window (its not a active link)

URL wraps to the next row

The screenshot shows a Saba meeting interface. On the left, the 'Attendees' panel lists 'TJ' and 'Vineet Kane'. Below it is a 'Chat' panel with a message history. The last message from 'TJ' is a long URL: `https://saba.sabacloud.com/Saba/Web_spf/SabaWork/local/home`. This URL is wrapped across two lines in the chat window. A red speech bubble points to the wrapped URL with the text: 'The URL pasted wraps t o the next row'. The main meeting area on the right displays the 'Meeting ID: NPP616834' and the title 'Using Agenda Builder'. It also shows a status message 'Your meeting has not yet started.' and a 'Start: 08-1' field. Below this, there are three large buttons: 'INVITE PEOPLE', 'ADD CONTENT', and 'ADJU' (partially visible). The 'INVITE PEOPLE' button has a subtext: 'Use this wizard to invite attendees to this meeting by email'. The 'ADD CONTENT' button has a subtext: 'Use this wizard to upload PowerPoint slides or other agenda content for this meeting'. The 'ADJU' button has a subtext: 'Use this w adjust yo and a'.

You still need to right click to copy the URL and paste it in the browser (its not an active link currently)

Enhanced Appshare from High Definition Screens

Saba Meeting

→ Improving AppShare from systems with High-DPI displays

WHAT?	Enhanced the Appshare when sharing from High-DPI Win10 machines
WHY?	Earlier, the participants could just see the screens partially
WHERE?	<ul style="list-style-type: none">• When screen is appshared from both 4k monitors, Surface Pro tablets and some Win10 laptops

App-based Agenda Builder

Saba Meeting

→ App-based Agenda Builder enhancement

WHAT?	Ability to create a new folder (under the root node) in the Agenda Builder as one of the “Add content” menu items.
WHY?	To bridge the missing gap and allow the folder creation from App-based Agenda builder also
WHERE?	<ul style="list-style-type: none">• App Client >> Lead a Classroom >> Add Content >> Build an Agenda >> Add Folder
NOTEWORTHY	<ul style="list-style-type: none">• Agenda Builder is only available for Classroom session currently

The New Folder

The screenshot displays the Saba Agenda Builder interface for a meeting titled "Using Agenda Builder (NPP616834)". The interface includes a top navigation bar with tabs for "Agenda", "SC-Update38...", "Advanced an...", and "AgendaBuild...". Below the navigation bar, there are buttons for "Save", "Export", and "Add". The "Add" button is highlighted with a red box, and its dropdown menu is open, showing options: "Appshare", "Evaluation", "File", "Folder", "Poll", "URL", "Whiteboard", and "YouTube video". The "Folder" option is highlighted with a red box. The main content area shows the meeting ID "NPP616834" and the title "Using Agenda Builder". Below the title, it states "Your meeting has not yet started." and displays the start and end times: "Start: 08-14-2017, 10:00AM" and "End: Ongoing". At the bottom, there are three buttons: "INVITE PEOPLE" (with a plus and people icon), "ADD CONTENT" (with a plus and document icon), and "AD" (with a plus icon). The "INVITE PEOPLE" button has the text "Use this wizard to invite" below it, and the "ADD CONTENT" button has the text "Use this wizard to upload" below it.

Analytics – Additional Dimensions

Saba Meeting

→ Additional dimensions added in Analytics

WHAT?	Possible to report on the 'Client' used and the 'Operating System' used by the attendees
WHY?	To be able to understand the overall usage pattern
WHERE?	Admin >> Analytics >> Saba Meeting >> Build a new report >> See new dimensions

Two New Dimensions added

Build a Flat List Report

Virtual Classes

VIRTUAL CLASS IMPROVEMENTS

→ What's New for U41?

All items from
Customer Community

Problem	Solution	Notes
Learner is not seeing completion of virtual sessions until end. Gets concerned.	Visual improvements to show learner their progress is seen	For virtual classes with multiple sessions, time spent is not sent back until after all sessions are complete. Another option is to use Blended DT.
Enrollment limit could be exceeded if class had multiple instructors	Instructor Assignments now raise Enrollment limit automatically	
Virtual class sessions could be deleted in social workflows	Virtual Class session can not be deleted by leader. Only can be cancelled via Admin workflows.	
WebEx automatically provides a telephone access code that could not display in Saba	Meeting ID (access code for WebEx) displays in UI and via notification keyword)

TOPIC

Integration Studio

Rest API Enhancements

SPC-111550 - Expose Rater Details

Problem	Integration partners need to know who are the raters for a particular review and who has still a task pending.
Solution	<p>Expose the rater details by providing an additional parameter in the request.</p> <p>GET .../v1/review/{id}?expand=raters</p> <p>A reviewRaterDetails section will be added to the payload including, among others, the following details:</p> <ul style="list-style-type: none">• Rater Status• Rater Name• Rater Type• Evaluation Due Date
Benefit	Customers can build a UI portlet via API to know who still has a review task pending.

SPC-111541 – Expose Job Board Data

Problem	Integration partners cannot post job requisitions to job boards as they don't have access to the selected posting attributes.
Solution	<p>Expose job board details using an additional parameter in the request. Every job board is different and has specific attributes.</p> <p>GET .../v1/job-requisition/{jobrqid}?includeJobBoardData=true.</p> <p>A jobBoardData section will be added to the payload including, among others, the following details:</p> <ul style="list-style-type: none">• Job Board Name• Job Board Code• Job Board Specific Attributes
Benefit	Integration partners can (finally) post job requisitions to external job boards.

Job Board Data Example

```
"id": "jobrq0000000000002244",
"jobBoardData": [
  {
    "name": "Metro Jobs",
    "code": "METRO_JOBS",
    "jobFamilyData": "Training",
    "locationData": "Canada",
    "stateData": "Ontario",
    "employmentTypeData": null,
    "salaryTypeData": "Per Year",
    "minExperienceData": null,
    "postedByData": null,
    "customFields":[]
  },
  {
    "name": "New Job Board",
    "code": "NM_CUSTOM_JOB_BOARD",
    "jobFamilyData": "Business Development",
    "locationData": "Australia",
    "stateData": "Maharashtra",
    "employmentTypeData": null,
    "salaryTypeData": "Per Year",
    "minExperienceData": null,
    "postedByData": null ,
    "customFields":[]
  },
  {
    "name": "LinkedIn",
    "code": "LINKEDIN",
    "jobFamilyData": "Business Development",
    ...
  }
]
```

SPC-111154 – Provide a Job Posting API

Problem	<p>Organizations must comply with federal laws and regulations (e.g. OFCCP, VEVRAA, EEO) in the US. They setup automatic job routing on appropriate job boards. Companies rely on external job boards services like Monster, Indeed, Glassdoor, eQuest, JobTarget, etc. to extract posted jobs and automatically post on appropriate job web sites.</p> <p>This is a huge market need in the US. Recruiting solution providers must provide a viable solution.</p> <p>Without a robust API, the alternate solution is to scrape the career web site which is not reliable, neither consistent across customers.</p>
Solution	<p>Provide a <u>public</u> API to access posted jobs as they appear on the external career web site.</p> <p>GET .../v1/job-postings GET .../v1/job-postings/{id}</p>
Benefit	<p>Easy access to jobs posted on career web sites in order to automate job posting distribution.</p>

Job Postings API Example

GET hprecruit-api.sabacloud.com/v1/public/job-postings

```
{
  "totalResults": 12,
  "startIndex": 1,
  "hasMoreResults": true,
  "itemsPerPage": 20,

Integration Studio

→ REST API

WHAT?	Expand Support for User Friendly attributes in People REST API
WHY?	Enable customers to reduce the number of REST API calls made to Saba by reducing the need to convert a Username or Person No to an Employee ID
WHERE?	System Admin > Manage Integrations > Web Services
NOTEWORTHY	<ul style="list-style-type: none">Retrieve Enrollments, Transcripts, Certifications, Curricula for a person without using ID E.g. GET /v1/people/username=PROSE/certifications/search?type=internal GET /v1/people/person_no=00001000/enrollments/search?type=externalRetrieving Job Roles and Security Roles for a person already supported lookup in U 40

Integration Studio

→ REST API

WHAT?	API to associate a picture to a person
WHY?	Many systems now contain a profile picture. While Saba did have Profile pics, the API for associating it to a person was missing
WHERE?	System Admin > Manage Integrations > Web Services
NOTEWORTHY	<ul style="list-style-type: none">• Add or change profile pic of a person E.g. <code>PUT /v1/common/profile/:person_id/profilePic</code> Headers: <code>Content-Type=Multipart/form-data</code> <code>SabaCertificate=313..</code> Parameters: <code>person_id: persn0000000000001000</code> <code>file: <The image file in JPG or GIF format></code>• Delete profile pic of a person <code>DELETE /v1/common/profile/username=PROSE/profilePic</code>• Username can be passed instead of Id when adding/removing a picture

Integration Studio

→ REST API

WHAT?	Enable retrieval of orders for a given PO or TUA using REST API
WHY?	Provide flexibility in looking up orders for customers integrating Saba with external billing systems
WHERE?	System Admin > Manage Integrations > Web Services
NOTEWORTHY	<ul style="list-style-type: none">Retrieve Orders for a specific TU Agreement or PO <p>E.g.</p> <pre>GET /v1/learning/order?q=(tu_agreement_id%3D%3Dtutpo0000000000001004) GET /v1/learning/order?q=(tu_agreement_number%3D%3D00001001) GET /v1/learning/order?q=(po_id%3D%3Dpordr0000000000001000) GET /v1/learning/order?q=(po_number%3D%3D00001100)</pre> <ul style="list-style-type: none">Only Equal operator supported for these parameters.Date restriction of 90 days does not get added for these

Integration Studio

→ REST API

WHAT?	Associate dynamic criteria to Audience type using REST API
WHY?	Customers need a mechanism to create criteria-based Audience types in bulk
WHERE?	System Admin > Manage Integrations > Web Services
NOTEWORTHY	<p>Step 1: Create a Smart List with the required criteria (available in U 40)</p> <p>Step 2: Create an empty Audience type (available in U 40)</p> <p>Step 3: Associate the Smart List with the Audience Type (added in U 41)</p> <p>E.g.</p> <pre>POST /v1/smartlists/addOwner { "parent": {"id": "stlst0000000000001062"}, "owner": {"id": "audie0000000000001000"} }</pre>

Integration Studio

→ REST API

WHAT?	Provide an Enhanced Offering Search API with many filters and output values
WHY?	Customers integrating with Saba Learning Catalog were required to make repeat calls for each offering to get detailed course information
WHERE?	System Admin > Manage Integrations > Web Services
NOTEWORTHY	<ul style="list-style-type: none">• API Signature GET /v1/offering/search?q=(criteria)• Fields Supported (as Filters and Display columns) OFFERING: Class No, Domain, Session Template, Status, Language, Delivery, Location, Custom fields, Start/End Date, Avail/Disc From, Max count, Max bookings, actual count, actual bookings, COURSE Course Id, Number, version, Title, Abstract, Description, Custom fields Competency and Competency Level, Categories, Keywords, Equivalents, Credits Person Id (for Audience type check)

Integration Studio

→ REST API

WHAT?	Enhance Held Certification API to support IN clause for status
WHY?	Customers often need to retrieve certifications for a learner in <i>one of</i> different statuses. This addition helps reduce the number of API calls required.
WHERE?	System Admin > Manage Integrations > Web Services
NOTEWORTHY	<ul style="list-style-type: none">Search for a learner's certifications in multiple statuses <p>E.g.</p> <pre>POST /v1/learning/heldlearningevent/searchQuery { "conditions": [{"name": "assignee", "operator": "==", "value": "persn0000000000001000"}, {"name": "status_description_cert", "operator": "IN", "value": [100,200,400]}] }</pre>

Data Import Enhancements

Remove Skills in Person Competency

Problem	Required Skills and Held Skills import allow to assign skills to users but cannot remove them. Request from the Community.
Solution	Enhance the RDI Person Competency import template to allow removing competency assessments. <ul style="list-style-type: none">• New optional ACTION column accepting DELETE_REQUIRER, DELETE_ALL_REQUIRERS<ul style="list-style-type: none">• DELETE_REQUIRER removes one assessment for a given competency from a given evaluator.• DELETE_ALL_REQUIRERS removes all assessments for a given competency.
Benefit	Allows to remove assessments in the event of a mistake in the rating or when inappropriate language is used. Removes the risk of offending employees and prevents litigation issues.

Integration Studio

→ Data Import

WHAT?	New Import for Signup Rules
WHY?	Customers needed an automated way to manage self-registrations
WHERE?	System Admin > Manage Integrations
NOTEWORTHY	<ul style="list-style-type: none">• All 3 criteria supported - Security keyword, email domain and Other.• SKIP is supported• Unique ID is Name. Hence, use caution when trying to update name.• Associations like Learning and Skills can be added. However, all associations must be passed when updating the record.

Integration Studio

→ Data Import

WHAT?	Extend SKIP behavior to more imports
WHY?	SKIP greatly improves the usability of imports.
WHERE?	System Admin > Manage Integrations
NOTEWORTHY	<ul style="list-style-type: none">• New Imports supporting SKIP<ul style="list-style-type: none">• Bulk Content Import• Student Certification / Curriculum Imports• Registration Import• VC Offering Import

Integration Studio

→ Data Import

WHAT?	Enhancements to Individual Imports
WHY?	Community Asks
WHERE?	System Admin > Manage Integrations
NOTEWORTHY	<p>A. Offering Imports</p> <ul style="list-style-type: none">• Ability to associate Checklists (supported on all 4 offering imports - ILT, VC, WBT, Blended) <p>B. Held Certification / Curriculum Import</p> <ul style="list-style-type: none">• Grant certification/curriculum to learner using Import. Other actions like Assign, Cancel, Revoke were already supported. <p>C. Job Role Import</p> <ul style="list-style-type: none">• Assign / Remove courses from Job Roles using Job Role Import. <p>D. Ad hoc Transcript Import</p> <ul style="list-style-type: none">• Support Cancel / Revoke for recurring course completions in Ad hoc Transcript Import. Cancel will only work on "Assigned" status, and Revoke on "Acquired" status.

Marketplace

WHAT?	Enhancement to Lynda course sync
WHY?	Valid courses sometimes got marked as retired.
WHERE?	Marketplace > Lynda
NOTEWORTHY	<ul style="list-style-type: none">Previously, Lynda course sync only fetched active courses on each run. Courses got retired if they were absent in a particular run. On some occasions, the Active courses API returned an incomplete result which caused many valid courses to retire.This change fetches another list of retired courses from Lynda. And ensures only courses mentioned in the retired list get marked as retired.

Saba Video

WHAT?	Introduction of Saba Video
WHY?	Customers were getting sub-optimal performance with uploading videos as files. Customers were looking for a one-stop shop for Video-based Learning
WHERE?	System Admin > Configure System > Saba Video
NOTEWORTHY	<ul style="list-style-type: none">• A one stop shop for customers looking to include Video as part of their Learning• Natively Upload videos to Saba. Videos asynchronously get transcoded to different bit rates (for best streaming performance)• Stream videos on any device and any network. Adaptive Streaming ensures minimal to no buffering, by adaptively adjusting video bit rate.• Videos can be used as part of Formal Learning, Informal Learning and many other places• Video streaming in Saba is secure.• There is a price (yet to be finalized) for Saba Video

Saba Video

WHAT?	Services for Saba Video
WHY?	Support Saba Video
WHERE?	System Admin > Configure System > Saba Video
NOTEWORTHY	<ul style="list-style-type: none">• Separate Service for Formal and Informal Video. The price includes access to both formal and informal video, unless noted otherwise in pricing.• Informal Video service includes Canvas and Announcements as well.

Saba Video

WHAT?	Upload Streaming video as content
WHY?	Customers were getting sub-optimal performance with uploading videos as files. Customers were looking for a one-stop shop for Video-based Learning
WHERE?	Learning Admin > Manage Content
NOTEWORTHY	<ul style="list-style-type: none">• New content format called "Video Content".• Provider will default to Saba Video, once configured.• User can upload Video from desktop, or choose a video uploaded earlier• Admin can configure what % of video watching is required to automatically mark complete.• Videos cannot be imported using API or RDI.

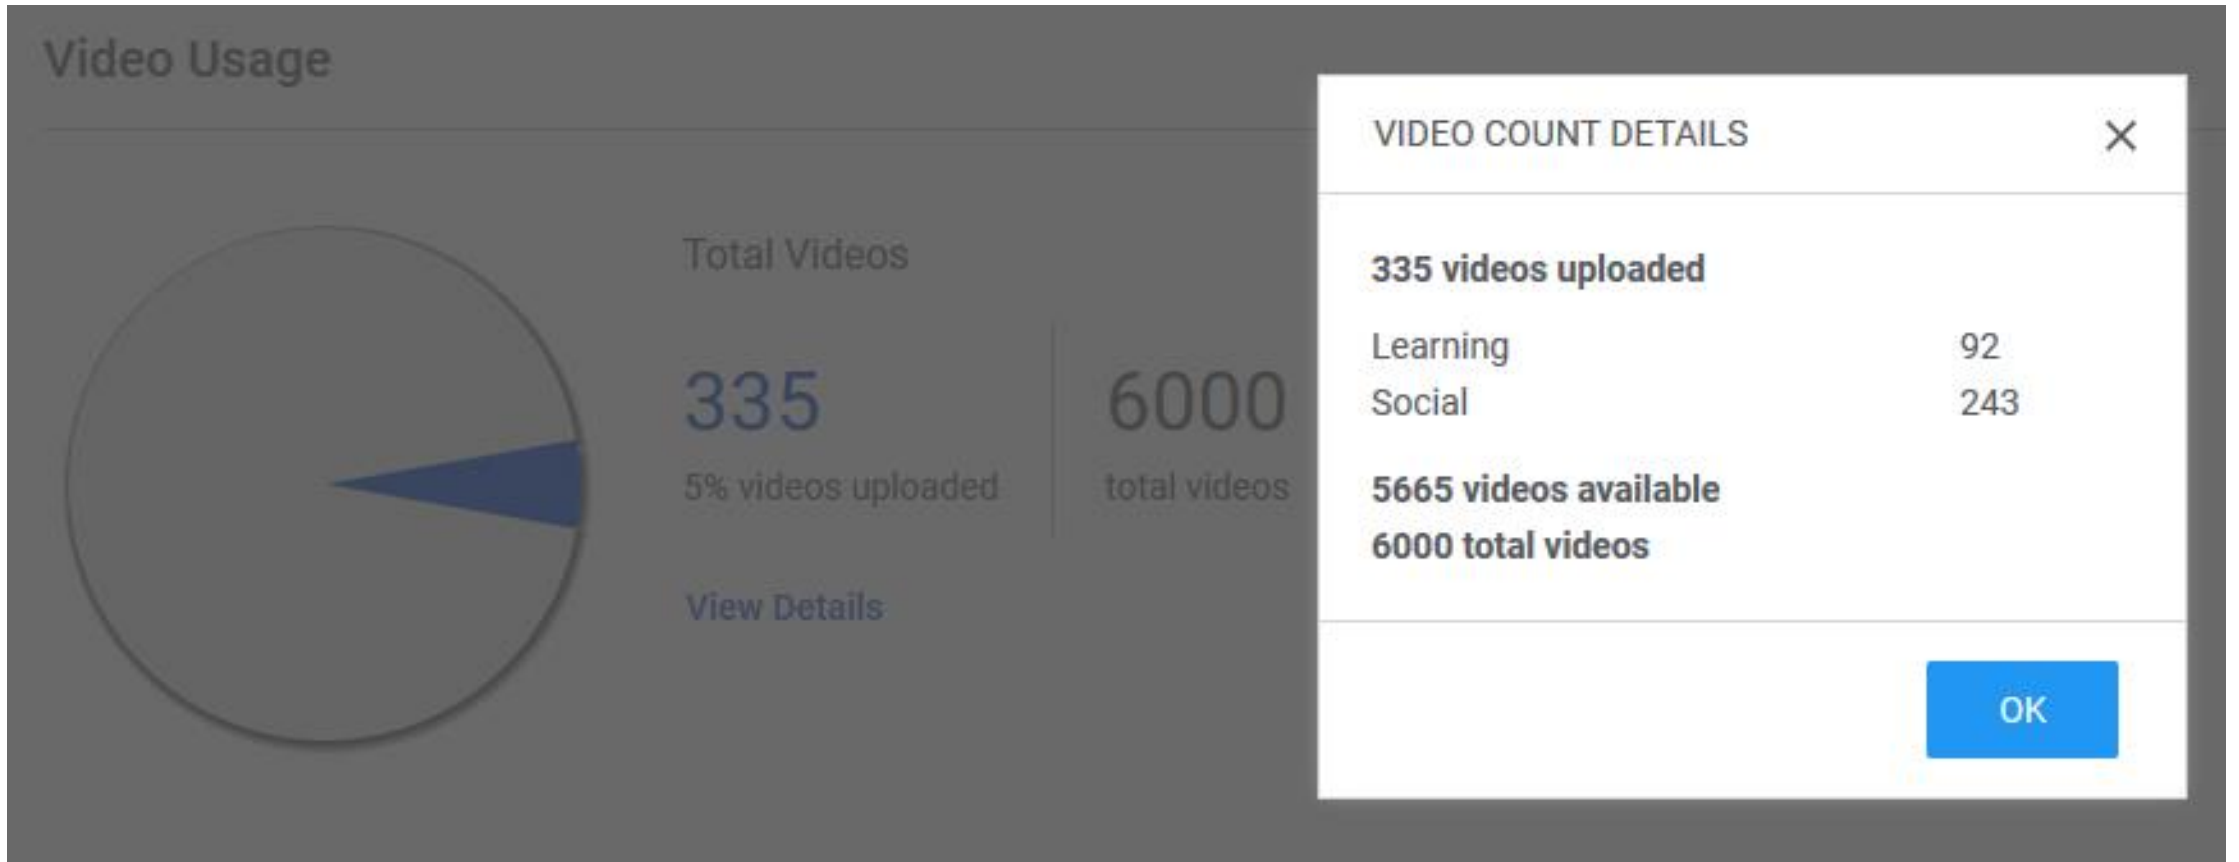

Saba Video

WHAT?	Probable Pricing Parameters for Saba Video
WHY?	Support Saba Video pricing
WHERE?	Cloud Admin
NOTEWORTHY	<ul style="list-style-type: none">• Pricing is not yet finalized, but it will most likely be based on 2 or more of the following factors:<ul style="list-style-type: none">• Number of users (uploading or watching a video)• Number of videos• Storage• Number of views• Depending on the contract, Cloud Admin will configure the upper limit on the above parameters.

Saba Video

WHAT?	Monitor Video Usage Search/Delete unwanted videos
WHY?	Customers can manage (and delete unwanted) videos without going through Support.
WHERE?	Learning Admin > Manage Content > Manage Videos
NOTEWORTHY	<ul style="list-style-type: none">• The screen shows how many videos have been uploaded vs the limit configured• Allows searching for videos by file size, author, creation date and popularity• Allows deleting videos permanently from Saba. Videos deleted cannot be recovered.

Analytics

Analytics

→ Attribute stats in U41

	Dimensions	Metrics	OOB Reports
New in U41	115	24	10
Total	3983	461	164

Analytics → Restricting ad hoc emails to address security concerns

WHAT?	Sending report data to ad hoc email addresses in a report schedule is a potential security risk
WHY?	Customer security team raised this concern since they are a financial entity and considered this a potential loophole to send out sensitive data
WHERE?	Admin->Analytics->Settings->Disable Adhoc Emails Admin->Analytics-><Report Name>->Add Schedule->Recipient Type
NOTEWORTHY	<ul style="list-style-type: none">• The property is OFF by default and the admin will have to turn it ON to be effective across report schedules• If there are existing schedules with ad hoc emails, the processing of such adhoc email addresses will be ignored if this property is ON

Analytics → Show time in HH:MM:SS format

WHAT?	Option to display time field data in HH:MM:SS format
WHY?	A couple of financial entities requested that they need data to be displayed in HH:MM:SS AM/PM format since they were having a strict compliance requirement in their business process to be granular to the second in determining completions/attendance etc.
WHERE?	Admin>Analytics>Settings>Configuration
NOTEWORTHY	<ul style="list-style-type: none">• Introduced a new datatype called Time to handle this without causing regression to existing reports and so have a dual support for all time attributes added prior to U41• All time fields will show the value as per the logged in user locale time format• Conditional formatting will not be applied on Time Data type attributes• Collate will not be applicable for Time attributes• Sorting and filtering (if applicable) will work as Time data type <div><p>reports that are already set with an o</p><p>Display time in user's locale: <input checked="" type="checkbox"/></p><p>Display time fields in user's locale</p></div>

Analytics → Check-ins Status Report

WHAT?	Report and dimensions to enhance Check-ins reporting	
WHY?	<ul style="list-style-type: none">• The number of 'Check Ins' that each employees has had with their manager within a date range.• The date, time and duration of each 'Check In' for each employee	
WHERE?	Admin->Analytics->Reports->Check-ins Status Report For both Managers and Admin users	
NOTEWORTHY	Display Attributes <ul style="list-style-type: none">• Person Organization Name• Manager Full Name• Person Full Name• Check-In Start Date• Check-In End Date• Check-In Duration (Minutes)• Last Check-In Date• Last Check-In Duration Metrics <ul style="list-style-type: none">• Total Check-Ins• Total Check-In Topics• Average Check-In Duration (Minutes)	Filter Attributes <ul style="list-style-type: none">• Include Manager Hierarchy• Hierarchy Manager Full Name• Is Terminated• Check-In Start Date• Check-In End Date

Analytics → GDPR “Stop Processing”

WHAT?	Analytics exports restriction for terminated user profiles marked with “Stop processing”
WHY?	Product compliance with EU GDPR norms for Right to Restrict Data Processing
WHERE?	All report types->Report Execution->All Download formats
NOTEWORTHY	<p>Users that are terminated and marked as “Stop processing”, will not be shown in report data when the report is exported to CSV, PDF, or Excel from the UI or schedules. However, such users will be visible when the report is viewed on the UI</p> <p>Major clause requirement is that the SC should not inadvertently be the Data Controller by allowing data to be exported to other downstream applications</p>

Analytics → Number charts

WHAT?

New visualization introduced in Analytics

WHY?

Simple, powerful, usable visualization to represent insights using metrics

WHERE?

In any report type on report execution

NOTEWORTHY

- Number charts can hold up to 3 metrics
- Every Pie chart can be converted into a number chart. Top 3 values are represented as metrics in a number chart format.
- Number charts can be included in dashboard reports for easy consumption of daily metrics
- Number chart metrics (the one's converted from a pie chart) presented in a dashboard can be clicked to drill down into the report that sources these metrics
- Number charts (the one's converted from a pie chart with dimensions) follow color configurations pre-configured for LOV value based dimensions
- For all other metric values, the author can choose the color palette for representing the metric values
- When data is not well formed, the label is shown as "Not Applicable" under a metric. For example – Location may not be associated with each team member yet the head count metric will count those team members.

Analytics → Team Status Overview Dashboard

WHAT?	A dashboard for every manager to easily consume “state of the union” for their teams
WHY?	Much needed dashboard that presents team insights to the manager Showcase combined power of number charts and dashboards
WHERE?	My Team->Dashboards->Team Status Overview
NOTEWORTHY	<ul style="list-style-type: none">• This is an Out-of-the-box representation of insightful metrics for a managers team• The construct uses a dashboard and number charts sourced from individual reports• The current construct pre-defines the areas of interest and metrics for consumption by the manager• If a service (E.g. Performance) is OFF, the corresponding module in the dashboard will not appear in this pre-defined OOB report• We have an existing feature that allows admins to add/remove such dashboards thereby not constraining them to consume dashboard data which we have pre-defined

Analytics-> Team Status Overview Dashboard

Analytics → Pivot Analysis (Major feature)

WHAT?	Data Modelling enhancement using Pivot Analysis
WHY?	By definition, a pivot table allows you to extract the significance from a large, detailed data set. Today this is achieved in multiple, sometimes cumbersome steps, by creating a flat list report and then exporting into excel and finally using Excel features to perform this pivot analysis
WHERE?	Licensed feature – Price book SKU in progress Will be present as a new report icon
NOTEWORTHY	<ul style="list-style-type: none">• New report type introduced. Major improvement over a cross tab report.• Allows multiple dimensions in rows and columns with a single metric for data significance determination• Multiple features to allow pivot analysis with color coding and aggregate functions• Sorting rows and columns• Easy drag and drop of interspersing rows and columns• Pivot author can provide a default pivot based on a simple report format and other consumers can make their own pivot analysis and save as user preference• Positioning – Pivot Analysis helps the report consumer to work through a set of data and perform slice and dice analysis to extract significant data for their business purposes
