Saba University

Job Aid: Update 43 Enhancements to the User Interface
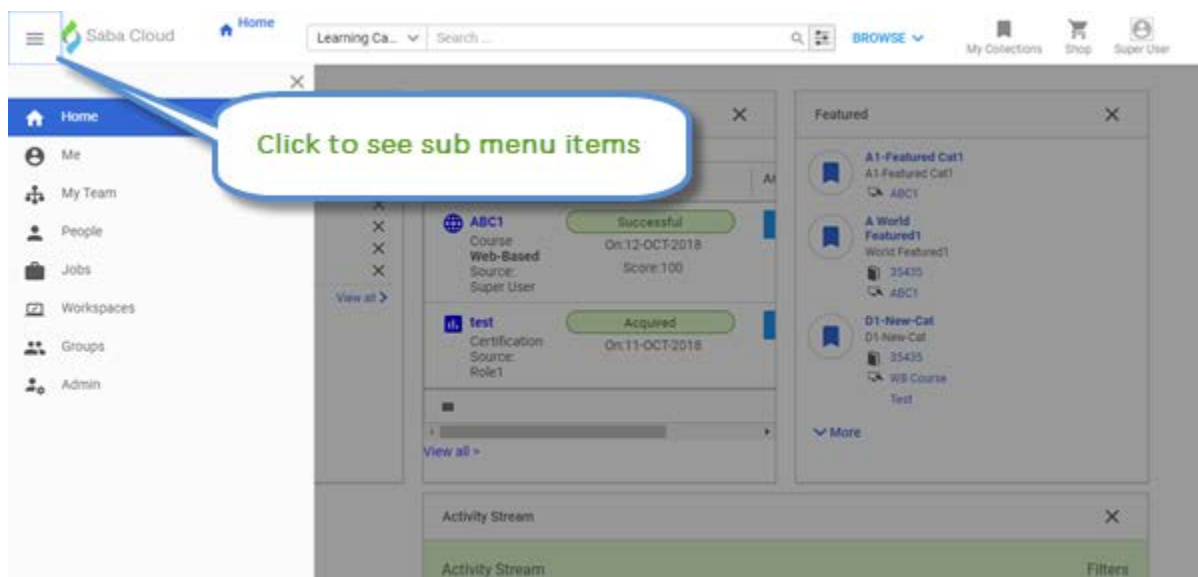

Core Concepts

What are the key highlights?

The header of the Saba Cloud is now cleaner. The side bar style sub menus help save multiple clicks and page refreshes. It has an always visible search area.

The sub menus appear when you click ☰ .

If **System > Configure System > Services > Foundation > User Interface > Enable drawer menu** is disabled, the header appear like the one below. The sub menus appear as tabs under the header.

➲ *Note: **Enable drawer menu** was earlier called **Enable new tile style IA**.*

New header with new tile style IA disabled

User's menu items
The user's menu items in the new header are now moved under the user's dropdown menu.

The count of unread messages now appears as a badge over the profile picture on the **Home** page.

My Collections
The look and feel of this dropdown list has been updated.

Sub menus of the top-level menus

The sub menus of the top-level menus like My Team, People, Groups, Admin now appear as a side bar, which give more space to the pages.

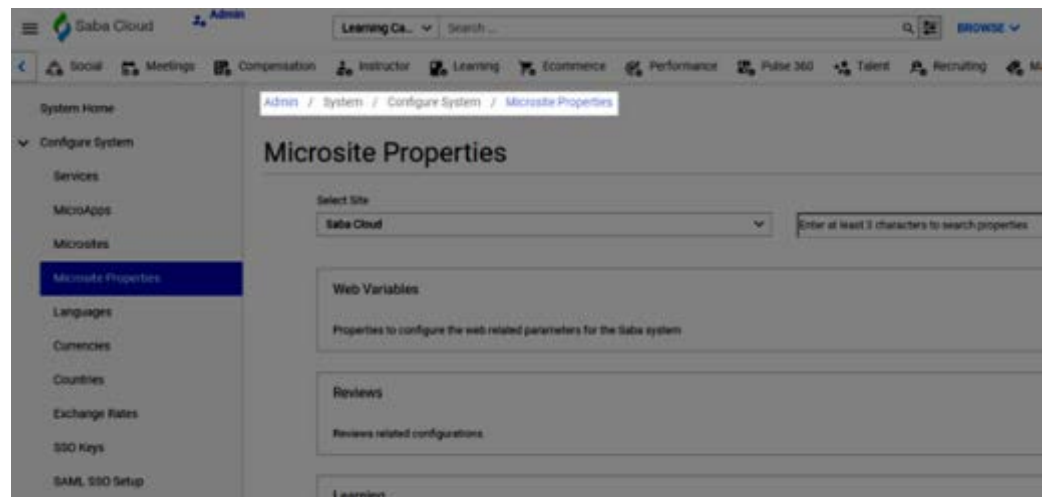

Side bar

The side bar now allows directly reaching a particular page by clicking the appropriate menu item, thus saving multiple clicks and page refreshes.
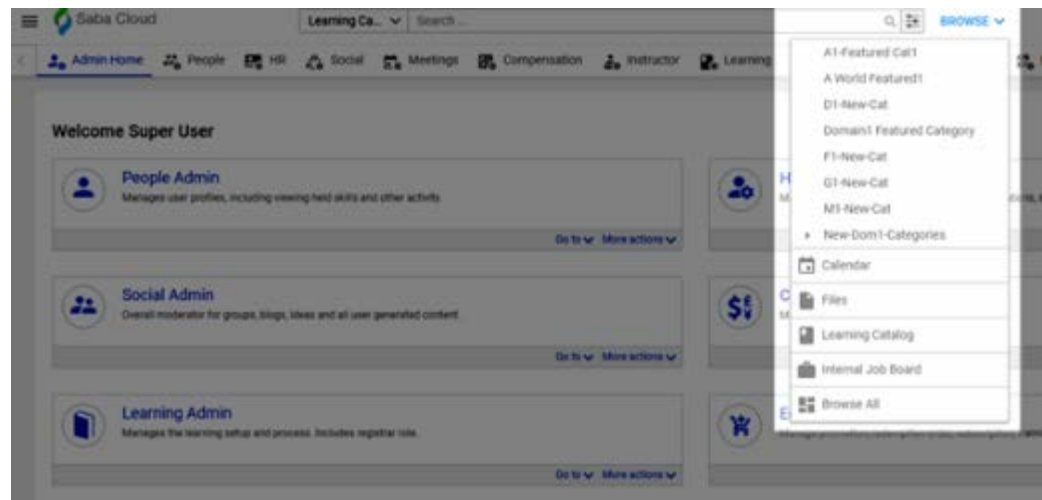

Breadcrumb navigation
The pages now also show a breadcrumb navigation to indicate the path and the current location in Saba Cloud.

Browse dropdown
The Browse dropdown menu is now repositioned near the search bar.

Advance search
The Advance search bar appears like the one below.

Updated layout of portlets on the Home page

When the new user experience is enabled, the appearance of the following portlets change. As an end user, you can now add and enable portlets by clicking **Configure Dashboard** from the user name dropdown menu on the Home or Dashboard page.

Available portlets include:

- How's it going?
- Facebook
- Learning
  - Browse
- Meeting
  - My conferences
  - My Meeting Recording
  - My Meetings
  - Ongoing meetings
  - Public Events
- Performance
  - Leaderboard
