MODERNIZED HOME PAGE

Simpler and more intuitive to
use

Modern and image-centric
experience

Our Strategy: Responsive Web App & Native Mobile App

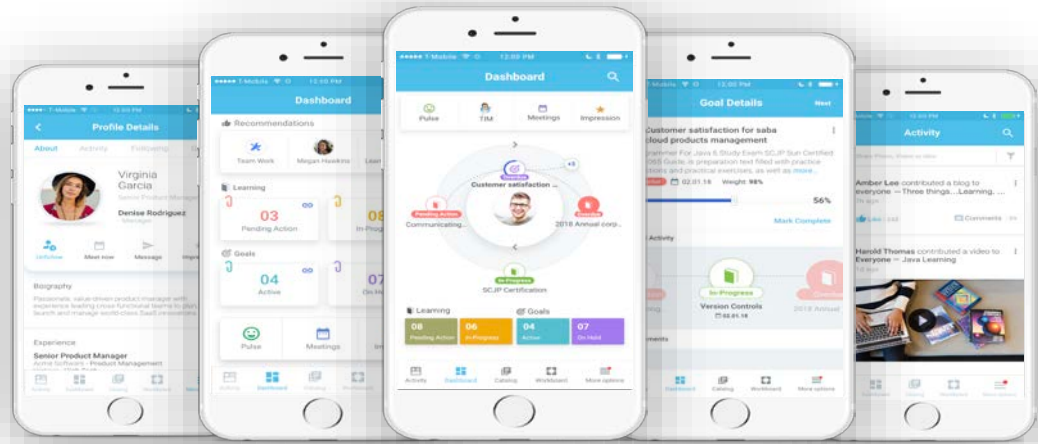

For mobile app we want “**just enough**” of end user feature and no distractions.

The native mobile app focuses on end user and manager consumption with a few administrative tasks like instructor desktop.

- Offline Content Consumption
- Scoped Access to Functionality
- Mobile Apps Advantage
- Shared Device Mode
- Secure Access
- Control
- PUSH Notifications
- User Preference

Responsive web app must address access to the entire application feature set on different device configurations

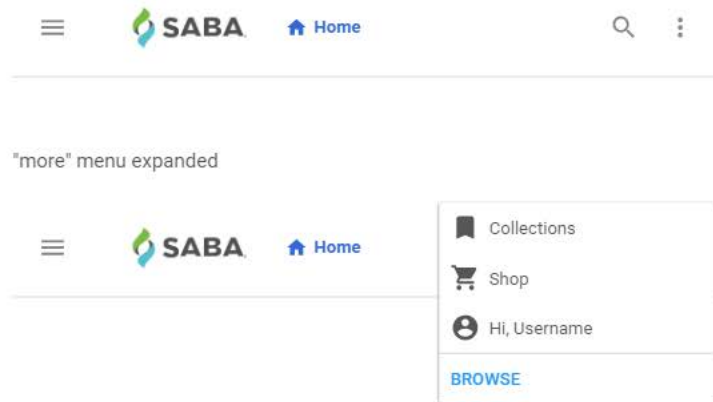

Responsive Header and Navigation

What?	If new Home Page is enabled, the torque shell will also be enabled.
Why?	Adapts to multiple screen sizes and resolutions; "No Click to Pick" search.
Where?	Visible on almost all pages of web app
Key Notes	<ul style="list-style-type: none">• Header adjusts to various screen sizes • User can directly type into search without clicking • Waffle replaced by a Hamburger-style drop-down• More limited set of menu counters• Help moved to Profile Drop-Down• Updated Profile Card

Responsive Header and Navigation

SM (568px)

MD (768px)

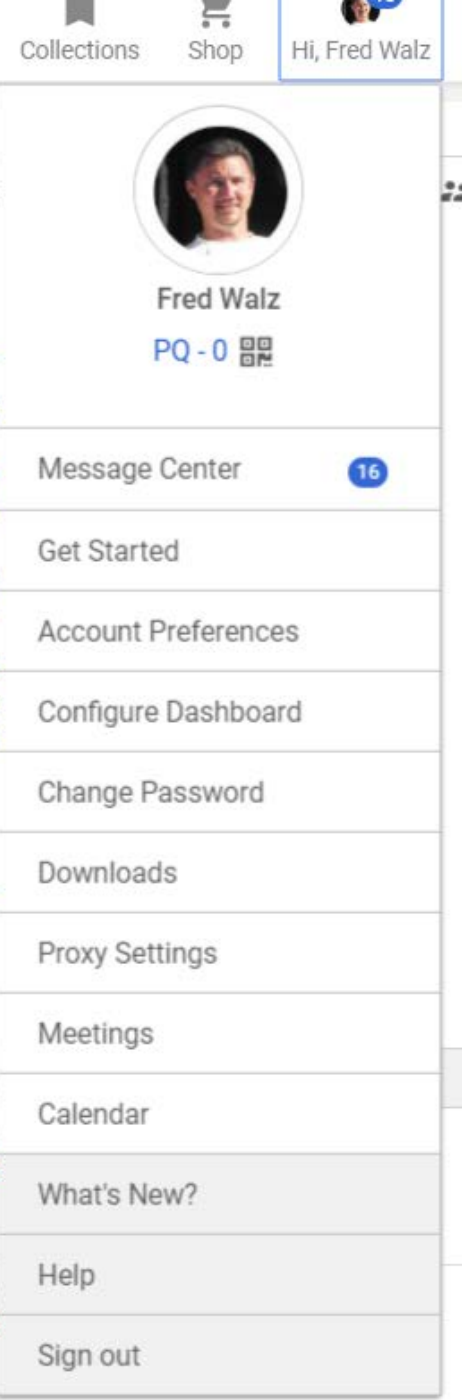

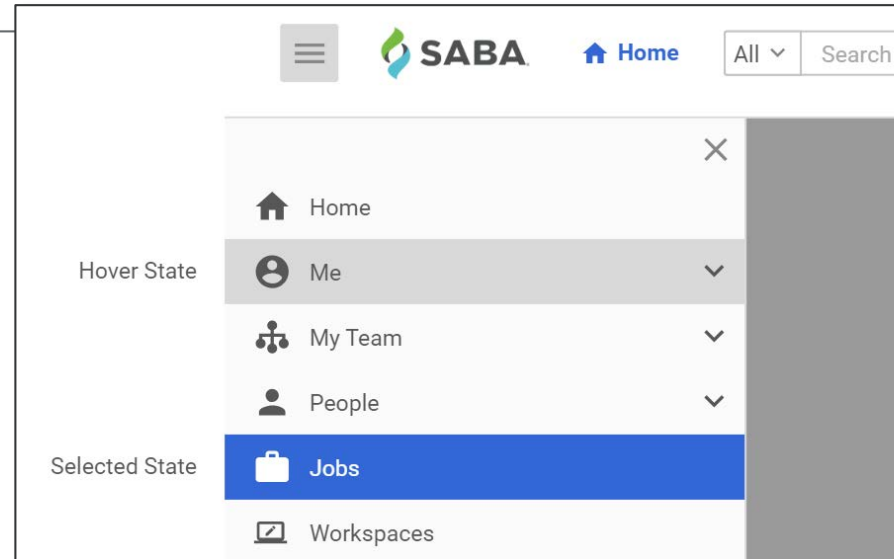

LG (1024px)

XL (1280px)

XXL (1920px)

Responsive Home Page

What?	Responsive Home Page
Why?	Optimize Home Page to adapt to variety of screen sizes and resolutions Improve Home Page usability and customer value.
Where?	Visible on almost all pages of web app
Key Notes	<ul style="list-style-type: none">• Submit a support ticket to enable new Home Page.• For one release, U43 will support old and new home pages. We will end support for the “legacy” home page with Update 44.• In U44, we will have additional portlet updates.• Responsive Home Page will require customer update of Canvas and Announcements portlet content – we will be posting best practices and templates.• Responsive Home Page will require latest browser versions, including IE11.

Home Page design plans were based on extensive review of customer usage and input.

What were the use cases?

Were there clear trends?

What was valued?

What were the challenges?

GO TO PLAN

HOW'S IT GOING?

Me

Management

Company

What Customers Valued and Found Challenging

Customer Focused

- Highly configurable
- Can put own branding, wording, workflows especially via combination of canvas and pages.

"Client Centric"

- Branding, promotion, critical information for multiple audiences.
- One Platform; Many Entryways

"User Centric"

- Combining use of available portlets and Canvas, Customers are able to get users to important workflows of their choosing in one click
- One click to key tasks; no click to some tasks.

"Feels like one system"

- Canvas configuration allows smooth transition from Intranet to Saba Cloud

Mandatory landing page

- I can't turn home page off and direct users to specific page, or make it secondary
- Tough for a single-use customers

Unfocused, Overwhelming

- Can be confusing depending on how it is organized
- Too many options "I don't know what to do"

Canvas Creation

- Powerful but requires web development Skills / Money
- Everything happens "under the fold"

Portlet Issues

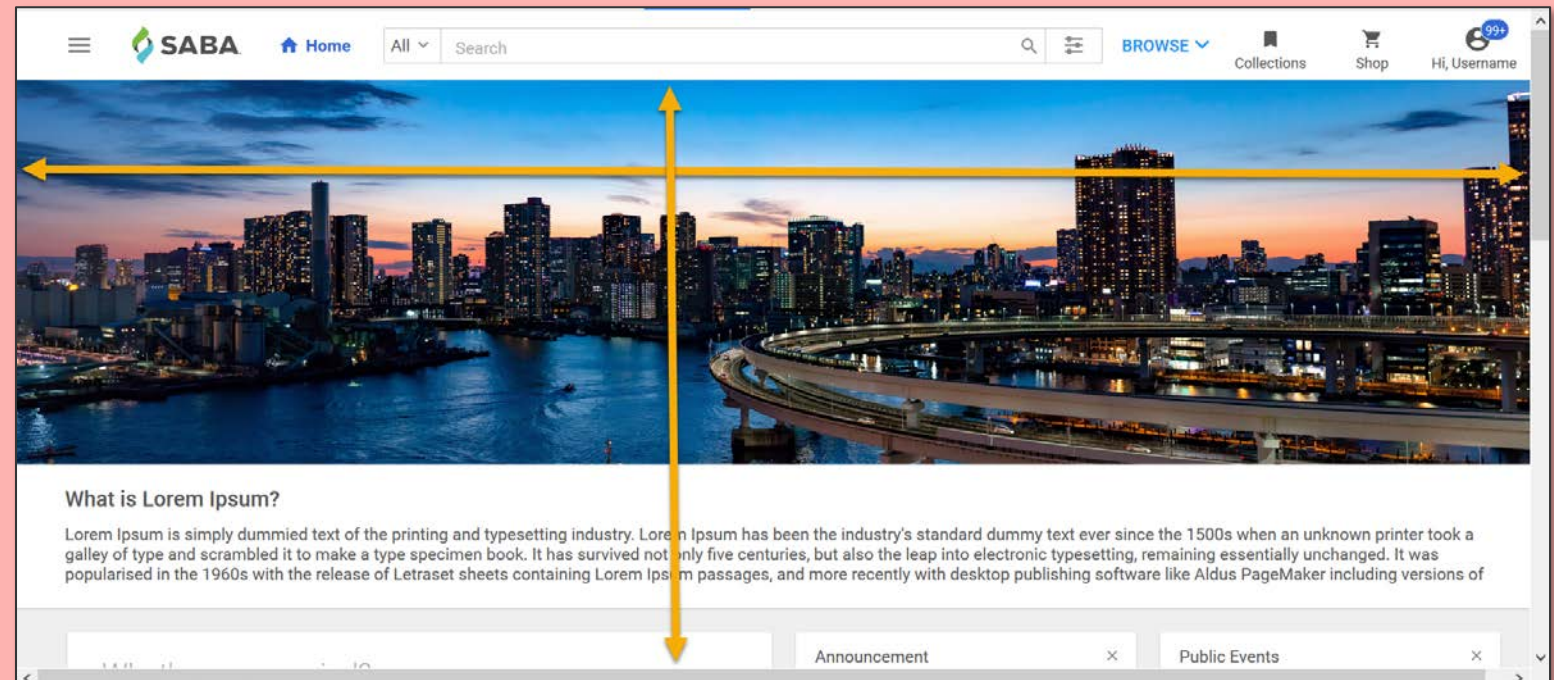

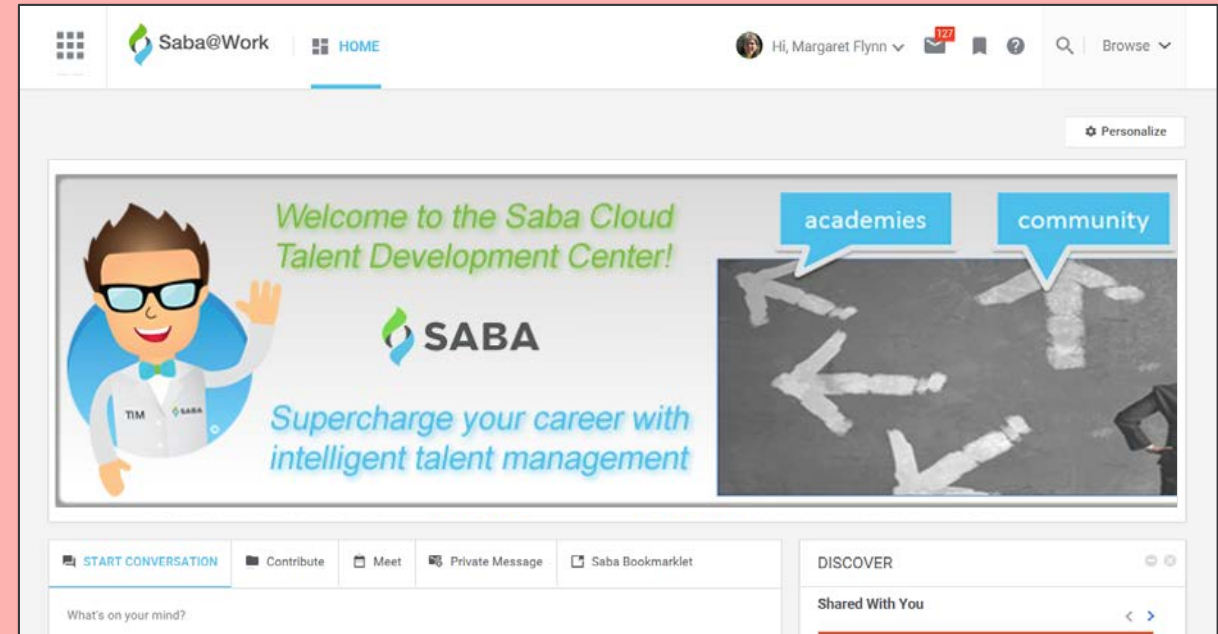

- i.e. My favorite group shows most used groups not my favorite groups
- 9 portlets for Ideas/Issue –duplication and redundancy

HOME PAGE - SHOWCASE THE CUSTOMER

Full Page - Canvas is Edge to Edge, Top to Customer's choice of bottom.

Clean - Homepage configuration options only show when needed.

Easy – Responsive Canvas Templates will be provided

IT'S Q2 @ SABA.

Configure Dashboard Mode

The screenshot displays the SABA | CONTENTQE dashboard configuration interface. The main dashboard area features a dark header with a 'ME' dropdown menu, 'ADD PORTLETS' and 'ENABLE PORTLETS' buttons, and 'CANCEL', 'RESET', and 'SAVE' buttons. Below the header are two portlets: 'Announcements' and 'Browse'. A configuration modal is open on the right, showing a user profile and a list of options: 'Get Started', 'Account Preferences', 'Configure Dashboard', and 'Change Password'. Arrows point from the 'Configure Dashboard' option in the modal to the 'ADD PORTLETS' and 'ENABLE PORTLETS' buttons on the dashboard.

- Configure Dashboard is available if user has rights.
- When not in use, configuration will not take up valuable space on the Home Page.
- Portlet opens show as little cards – much clearer how to enable and add.

LEARNING IS DOING

Streamlined Contribution and
Activity Stream

Supports **drag/drop** and **paste**.

Improved smart filtering.

Fresh Contribution Panel

What?	Updated Contribution Experience on the New Home Page
Why?	Modern Contribute and Consume Experience
Where?	New Home Page
Key Notes	<ul style="list-style-type: none">• Responsive Portlet• No click to contribute both discussions and resources• For convenience resource titles default in from filename. Can be changed.• Drag / Drop option for Resources• The first 80 characters of the text will be considered as a title for a discussion, idea, and issue. No need to “click to add more”• Only available on new torque home page. Will not impact activity streams in groups or under shared resources until those pages are redone• This is Phase 1 for Contribution panel where we wanted to focus on achieving parity with “legacy” activity stream. Phase 2 will include address new functionality including emoticons, @mentions, hashtagging, as well as additional contribute options

Fresh Activity Stream

What?	Updated Activity Stream on the New Home Page
Why?	Modern Contribute and Consume Experience
Where?	New Home Page
Key Notes	<ul style="list-style-type: none">• Responsive Portlet• Super fast postings• Alert of New Posts while you are scrolling• Better surfaces actions like rating so user does not need to click to details page.• Only available on new torque home page. Will not impact activity streams in groups or under shared resources until those pages are redone• This is Phase 1 for Activity Stream where we wanted to focus on achieving parity with "legacy" activity stream. Phase 2 will include address new functionality including emoticons, @mentions, hashtagging, as well as additional contribute options
